MSP GEOTRANS LINUX INSTALLATION INSTRUCTIONS

The distribution of GEOTRANS for Linux is packaged as a compressed tar archive named either *linux_user.tgz* or *linux_dev.tgz*. To install it:

1. Create a directory to contain the distribution:

    % **mkdir /home/geotrans**

    Note: You may replace */home/geotrans* with your preferred install path.

2. Change your working directory to the directory you just created:

    % **cd /home/geotrans**

3. Copy the archive from wherever it is located, to the GEOTRANS home directory:

    % **cp linux_user.tgz /home/geotrans**

4. Uncompress the archive using the Gnu unzip utility:

    % **gunzip linux_user.tgz**

5. Extract the contents of the tar file:

    % **tar xvf linux_user.tar**

MSP HELP DESK SUPPORT

For help with the installation, to report an issue, or for general support help of any kind, please send an unclassified email to: MSP_Help@nga.mil

GEOTRANS Enhancement Requests can also be reported to MSP Help or to the NGA Coordinate Systems Analysis Team (CSAT) at [314-676-9124, DSN 846-9124] – STL, [571-557-4002, DSN 547-4002] – DC, or email coordys@nga.mil.
